

Electrical Receptacles in Facilities with Accessible, Type A, and Type B Dwelling and Sleeping Units.

Evaluate the requirements in the Standard for electrical receptacles in facilities with Accessible, Type A, and Type B dwelling and sleeping units, including residential and common use kitchens. Review the technical requirements for such operable parts, including associated reach ranges and clear floor space. Review the scoping requirements in federal laws, the International Building Code, and related requirements in the National Electrical Code and, recommend revisions to technical and scoping criteria to resolves conflicts and challse kc6ET@.00000912 0 61.
