

## A117.1 Proposed Task Group Scope and Objectives

August 4, 2020

**Name of Study Task Group:** Accessible Bathing Facilities

**Scope and Objectives:** Review and determine required bathing/shower fixtures and accessories for all occupancies where provided, that are safe and effective. Make recommendations to the Committee for any changes to the Standard.

**Tasks:** Considerations include, but are not limited to, the following:

1. Scoping for tub/showers. Consider only allowing tub showers with removable seats if the tub/shower is required by code. Tub seats can be dangerous. Is the head end shower usable?
2. Research tub seats on the market today looking at safety and security when installed to find common elements
